## VITILIGO // EFFECTIVE TREATMENT

### VITILEMNA - tablets

For a long period of time vitiligo was considered an incurable disease. However, in the present, people who have been diagnosed with it, have a hope. "Vitilemna" is a Czech-made medicine, which is used to treat vitiligo and psoriasis. Due to its natural structure it is safe, does not cause allergy and is recommended to be applied from the age of 6. The main **active ingredient** is the **duckweed extract**, saturated with vitamins, macro- and microminerals, as well as rare amino acids. Amaranth **nourishes the skin**, fights inflammatory processes and strengthens. Propolis **promotes metabolism**, stops itchiness (which is very important in both with vitiligo and psoriasis), accelerates regeneration of tissues. Plus, as a whole, it favorably affects immunity.

**BUY**  
**VITILEMNA**

### What is the advantage of this medicine?

Vitilemna is non - addictive. Instead, its effect accumulates over time. The tablets can be taken as a primary remedy for **vitiligo** or **psoriasis**, or in combination with other treatments. Visible results are not immediate, the first results in the treatment of white spots on the skin can be observed in the second or third month, after that the effect is only increases and strengthens. The medicine produces faster results when used in combination with Vitilemna gel.

The tablets restore the **normal level of melanin** in the cells, healthy color and appearance of skin come back. **Vitilemna** is also recommended as preventive remedy, since the recent studies evidence that in more than 65 cases out of 100, white spots on the body are hereditary.

The course does not require prior cleaning of the body, dieting and allows people to lead usual lifestyle. The medicine has restrictions only for pregnant and lactating woman, children under the age of six, and people with individual intolerance to certain ingredients of vitilem.

## VITILIGO // EFFECTIVE TREATMENT

### VITILEMNA GEL

Vitilemna gel is very suitable for the **treatment of vitiligo**. It is made on the basis of natural ingredients, and the main active ingredient is the duckweed extract. With the regular use of this medicine the allergic reactions eliminate or even disappear in principle, the skin starts to regenerate faster. As a consequence of exposure to long-term, a normal, healthy appearance returns to the affected areas of the skin. The Vitilemna gel is recommended for use as a part of complex therapy to increase the effectiveness of treatment, and as an autonomous treatment, if the doctor considers the treatment with tablets excessive. Particularly good result is given by the gel when combined with **UV irradiation** (phototherapy 311NM). Sometimes significant progress can be achieved in a few weeks after the start of the course.

**BUY**  
**VITILEMNA GEL**

### Advantages of Vitilemna gel

The medicine is very easy to use: it is enough to apply it to the affected areas of skin 2 times a day, in the morning and in the evening. It is also recommended to treat 2 centimeters of healthy skin around the spot to prevent it from increasing.

The medicine has a pleasant slight plant odor. Before using the gel, the skin should be washed and dried. Then apply the product in a thin layer and hold for 5 minutes. If some substance remains, it can be gently wipe with a napkin. But in general, the gel is **well absorbed**, doesn't leave any marks on the skin and doesn't spoil the clothes. "Vitilemna" can be used together with different concealers. The main thing is not to mix the medicines.

## VITILIGO // EFFECTIVE TREATMENT

### VITISTEL - tablets

The "Vitistel" tablets is a unique medicine based on satinflower and amaranth extracts. With regular application, the **level of melanin reverts to normal**, the general condition of skin improves. The medicine also has general health-improving effect, helps to restore the skin, relieves itching and inflammation. Visible result appears with long-term use (about six months). The medicine has a cumulative property, the tolerance to it does not develop with time. The medicine can be used in monotherapy. However, it is also well-suited for complex treatment and can be perfectly combined with most other medicines. Significant improvement is observed with the taking of "Vitistel" tablets and **UV skin irradiation** in the narrow band spectrum (311 nm). In some cases Vitistel is recommended in combination with Vitilemna.

**BUY**  
**VITISTEL**

### What is the advantage of this medicine?

Since it is about exclusively natural composition, this medicine does not cause allergy (with rare exceptions). It is allowed even to pregnant and lactating women and children from 6 years of age. It can be used without changing the usual way of life, that is, cancellation of the diet, treatment for other diseases, trips and so on are not necessary. And as the addiction to the medicine never develops, it is not necessary to take breaks in treatment (these recommendations concerned the compositions of the old generation).

Vitistel has no side effects. It copes with both small **white spots on the skin**, and with the extensive spread of vitiligo. The medicine can be used as a precaution and also as prevention for further spread of spots, if they have already appeared.

VITILIGO // EFFECTIVE TREATMENT

# LAMP 311 nm PHILIPS PL-S 9W / 01 / 2P 1CT

**PHILIPSPL-S 9W / 01 / 2P 1CT** is a medical **light bulb** manufactured by the same-name company in Poland.

It allows **narrow-band skin treatment** in the spectrum of **311 NM at home**. It is used in compact portable devices made for the treatment of vitiligo, psoriasis, eczema and other dermatological problems. This option can be both monotherapy and part of a complex impact on the body.

**BUY**  
**BULB PHILIPS**  
**PL-S 9W / 01 / 2P 1CT**

## Does it make sense to buy a separate light bulb?

The most part of manufacturers produce devices. And when they fail, the producers offer to buy the new ones, and not replace the bulb. So **PHILIPSPL-S 9W / 01 / 2P 1CT** is your chance to save money. In addition, you can assemble the device yourself: it's enough to buy a regular lamp and glasses for the solarium (eye protection). And the timer is easily replaced with a common clock or mobile phone.

## What is the advantage of this solution?

You don't need to pay for the device, so you save money. Moreover, with selection of suitable lamp, you will get a compact device, which is quite easy to travel with. Eventually, you can go to the business trips or on vacation without interrupting the treatment (and this is not advisable). And in the case of failure of one part of the device, finding a spare option will be cheaper than buying immediately the whole device.

Another advantage of the light bulb is its easiness of operation. To obtain the desired effect, it is enough **to irradiate the affected area of the skin** every day, starting with 10 seconds (but not more than 5 minutes). PHILIPSPL-S 9W / 01 / 2P 1CT is produced in the EU according to standards.

## VITILIGO // EFFECTIVE TREATMENT

### SOAP WITH DUCKWEED EXTRACT RESIN

**Soap with duckweed extract resin** heals and restores perfectly the skin with vitiligo. With the regular use of this medicine the spots gradually start to acquire natural shade, the amount of melanin returns to the usual rate. It can also be used as a preventive measure.

**Soap with duckweed extract resin** is distinguished with characteristic plant odor. Most people find it pleasant or even relaxing. In any case, the aroma does not stay on the skin and it is not absorbed by the clothes, if rinsed thoroughly. The soap can be used as a common detergent. For the best therapeutic effect, it is desirable to keep it for about 20-30 seconds on a white spot (or spots), and then wash it off.

**BUY**  
**SOAP WITH ALGAE**  
**EXTRACT RESIN**

### What is the advantage of this medicine?

Soap with duckweed extract resin is very convenient to use: you just wash your face and body every day, and your skin starts to acquire the natural color. Moreover, the product as a whole cares for the body, which is especially noticeable with regular application. The soap can replace the traditional ointments and gels or complement them in order to achieve even more progress. But unlike any other medicines this option does not look like treatment. So **if you are tired of constant therapy**, you can stop at such a medicine.

The soap foams rather well and is sparingly consumed. It is cheaper than the most of analogues. And since it is about the natural composition, you shouldn't be afraid of allergies or side effects.

## VITILIGO // EFFECTIVE TREATMENT

### VITIX - tablets

Vitix is a unique medicine based on the **bitter melon extract** and the biologically active complex Ektramel, which includes microelements, vitamins and **antioxidants**. Due to this composition, the skin regenerates rather quickly. The medicine is recommended for psoriasis and vitiligo, it can also be used for other **dermatological problems**. Stable effect is achieved with prolonged use. One package of Vitix is enough for a month, after that you should have a break for 14 days. The result usually appears in six months period. Vitix can be combined with other products, both for external and internal use. Since it is about a biologically active complex, the developers do not recommend to take tablets during pregnancy and when breastfeeding.

However, in general, the product is safe due to its natural composition, it neither **cause allergy** nor produce side effects, fits in well with other medicines. During the course you will not have to change your usual way of life.

**BUY**  
**VITEX TABLETS**

### What is the advantage?

It's very easy and simple to deal with Vitix: just take a single (!) tablet a day. It is no wonder that this medicine is loved by those who are tired of complex schemes and often forget to take the next medicine. The tablets are produced in France.

## VITILIGO // EFFECTIVE TREATMENT

### PROVIT - phototherapy set for 311 nm

The Provit set is intended for **physiotherapeutic treatment of psoriasis, vitiligo, eczema, dermatitis and local alopecia**. Due to the compact size and ease of use of the device you can work with it at home. And since the device is really small, it is also often taken to the trip, as it is quite mobile. Provit by its nature is an analogue of "Dermalight 80" and Kernel KN-4003, only in the budget price segment. As well as the listed devices, the device works with a medical bulb PHILIPS PL-S 9W / 01 / 2P 1CT. Therefore with its help you can independently arrange narrow-band irradiation of 311 nm for yourself.

**BUY**  
**PROVIT 311nm**

### What does the regular application of the device give to you?

With frequent use of Provit the normal skin color is restored. It is desirable to start the sessions with 10 seconds for one spot. Then the duration of the procedure should be increased every day with adding another 10 seconds (but not more than 5 minutes per body segment). **You should consult a specialist** before the course start.

### Advantages of "Provit"

Provita has its own strong points. In particular, it is the most **reasonable at price** among the ready-made devices. It is only cheaper to assemble such a device alone. But the ready-made version can be used immediately, which is more convenient. The device is supplied with instructions, including the Russian translation. The device is carefully packed, so it will reach you undamaged.

## VITILIGO // EFFECTIVE TREATMENT

### MELAGINEN PLUS (Melagenina Plus®) - a lotion

Melagenin Plus is produced on the basis of an **extract of human placenta**, it is intended **to restore normal skin pigmentation** (the previous level of melanin in the body returns). Moreover, it is quite effective for local alopecia, depigmentation due to psoriasis, burns and other dermatological problems. The medicine was developed in 1998, and since then it has been constantly improving. The appearance of the Plus attachment is associated with the addition of calcium chloride to the formula, due to which the substance acts even more effectively on the skin.

**BUY**  
**MELAGININ PLUS**

### How to use?

One of the advantages of Melagenina Plus® is its ease of use. It is enough to apply the lotion to the affected area 3 times a day, and then put it in the sun for 15 minutes or irradiate with a special UV bulb. The spot first turns red, and then begins to darken. As a result, normal skin color returns to you.

### The advantages of the medicine

Melagenina Plus® is consumed quite sparingly (1 bottle for one month on average). To apply it to the skin, you don't need to make tricks, it's enough just **to treat the spot with your fingers**.

The composition rarely causes allergy, side effects are also not observed. However, if you have individual intolerance to certain ingredients, it is best to consult a doctor before starting the course. The lotion is sold in dark bottles, so the product is reliably protected from UV radiation. We have all the evidence that the proposed **medicine is original**.

## VITILIGO // EFFECTIVE TREATMENT

### VITIX – gel

Vitiligo and **psoriasis** can seriously decrease the quality of life: white spots on the skin draw unwanted attention, prevent from socialization. In addition, decrease of melanin amount in the body keep us without natural protection from UV radiation, which increases the risk of corresponding oncological diseases. But scientists have found a way to cope with this challenge. And Vitix gel became one of the effective solutions.

This medicine on the basis of the bitter melon extract helps to restore the normal amount of melanin. Thanks to this, with regular use of the medicine, the familiar skin color returns. But to achieve a lasting effect you need a long course (from six months and more). However, for many, the first result appears after a few months of use.

**BUY**  
**VITIX GEL**

### The advantage of gel

The Vitix gel is produced in the EU, so you shouldn't worry about its quality and safety for a person. It is certified both in Europe and in Russia. The medicine can be used by children from 6 years of age. The scheme of application is very simple: 2 times a day, in the morning and in the evening, the medicine should be applied to the affected area of skin. The skin should be dry and clean. After treatment, you have to wait for 5 minutes and gently wipe with a napkin everything that was not absorbed,

The medicine is low-fat, it does not leave unpleasant spots on the skin. It has a faint plant odor, which fades very quickly. So you can safely use your usual make-up and perfume. Virtually it does not cause allergy.

## VITILIGO // EFFECTIVE TREATMENT

### MELAVIT – tablets

The Melavit tablets are medicine based on bitter melon extract. This plant is traditionally used in Chinese traditional medicine. More recently it draw attention of European scientists who carefully studied the properties and got the biologically active substance. As a result, now everyone who suffers with **depigmentation**, as well as **hyperpigmentation**, including too many freckles, is able to have normal skin color or significantly improve the situation.

The Melavit tablets **provide persistent effect** with prolonged use of the medicine. The total course duration is six months. However, often the first positive changes can be noticed after 2 months. To obtain a better effect, the medicine should be used simultaneously with the same-name gel.

**BUY**  
**MELAVIT TABLETS**

### Advantages of Melavit

Melavit tablets are produced in Europe under strict quality control. It is a natural medicine that practically does not cause allergy. Moreover, it is perfectly combined with other medicines. You have to take 2 tablets a day (morning and evening), which is also very convenient for many. You needn't to change your lifestyle and adapt to the medicine during the course.

Melavit often helps those people who for some reasons failed with other medicines. For example, it is allowed to use this medicine if you have allergy to beekeeping products, since it doesn't contain propolis. You can find out more about this if you specify your problems for us.

## VITILIGO // EFFECTIVE TREATMENT

### MELAVIT GEL

Psoriasis and vitiligo cause serious discomfort to the person suffering with these diseases. Ugly spots cause problems with socialization, in addition, they can itch and cause anxiety. The Melavit gel is able to relieve you from this problem within six months, or at least significantly improve the situation. The medicine is based on the **extract of bitter melon**. The eastern healers have been using the amazing properties of the plant for centuries. And recently the European scientists paid attention to this representative of the flora kingdom. As a result, they extract the biologically active component and created on its basis the **effective and safe gel**.

**BUY**  
**MELAVIT GEL**

### Application of "Melavit"

To obtain stable effect, the medicine should be applied every day, in the morning and in the evening, for half a year. The gel is applied to clean and dry skin, and it is necessary to treat both the spot itself and the skin around (1-2 centimeters). This is necessary to prevent an increase of the affected area. The medicine can be used for both treatment and prevention.

If you want to increase the effect of Melavit, then start combining it with the appropriate tablets. Also, the best result can be achieved if the skin is **irradiated in parallel with a narrow-band UV (311 NM)**.

The gel does not relate to medicines, but before starting the course it is desirable to consult a doctor. Do you have any questions? Please, contact us, we will gladly help.

## VITILIGO // EFFECTIVE TREATMENT

### VITICOLOR - masking gel

The Viticolor gel is perfect for **masking white spots on the skin** that appear with vitiligo. And it is not necessary to use it every day, since the product is perfectly kept on the skin for several days. There is nothing toxic in the composition, so it almost never causes any allergy, and it can be used even by children (from 6 years of age).

**BUY**  
**VITICOLOR GEL**

### How to apply?

You should apply the Viticolor gel to dry peeled skin with slightly grasping the edges. The effect does not appear immediately: you have to wait for a few hours. The spot will gradually darken, but if it remains too light, you can apply it again.

After several attempts, most patients find the optimal amount of the medicine they need to get the most natural shade.

### Advantages of the gel.

The users of the gel note that it is rather pleasant, low-fat by its consistency. The product does not spoil underwear and clothes, it has a faint cosmetics odor. After the skin dyeing, you can take a shower or swim in the sea: the medicine won't be washed off, so that no one will suspect anything. The action of the gel "Viticolor" in a way can be compared with autosunburn.

To make the medicine even more convenient to use, the developers have put a special brush in the packaging. Thanks to it, the substance can be evenly applied to the skin, and your fingers will have the normal color. The medicine was certified both in the EU and in Russia. It can be used on an ongoing basis, no side effects are found.
